

Sivanesh B Platform Engineer | DevOps Engineer

 sivaneshsiva24o@gmail.com  8825462473  Chennai  sivaneshb

SUMMARY

Certified Kubernetes Administrator (CKA) and Platform & DevOps Engineer with hands-on experience designing, automating, and operating cloud-native platforms across Azure and AWS environments. Experienced in Kubernetes, Terraform, Jenkins, GitHub Actions, Infrastructure as Code, observability platforms, and enterprise CI/CD systems. Strong background in platform engineering, DevSecOps, automation, and improving software delivery through scalable and resilient cloud-native solutions.

TECHNICAL SKILLS

Containerization & Orchestration

Docker, Kubernetes (On-prem, AKS, EKS), Helm

Cloud Platforms

AWS (EC2 for mac minis, Dedicated Hosts, S3, Load Balancers etc), Azure (AKS, VMSS, Container Registry, DNS Zones, Storage Accounts, Load Balancers etc)

CI/CD & GitOps

Jenkins, GitHub Actions, ArgoCD

Observability and Monitoring

New Relic, Prometheus, Grafana, Azure Monitor, AWS CloudWatch

Infrastructure As Code

Terraform, Ansible, ARM Templates

Security / DevSecOps

Trivy, SonarQube, Checkmarx

Version Control

Source code mangement - GitHub, Bitbucket (Git)
Artifact Management - Nexus RM, GitHub Packages

Automation and Scripting

Argo Workflows, Argo Events, Shell Scripting, Python, Groovy

PROFESSIONAL EXPERIENCE

Associate Software Engineer (DevOps)

o8/2024 – Present | Chennai

Cprime Technologies

- Designed, implemented, and maintained cloud-native infrastructure on Microsoft Azure using Azure Kubernetes Service (AKS), Terraform, and Infrastructure as Code to support enterprise software development platforms.
- Designed and maintained enterprise CI/CD pipelines using Jenkins and GitHub Actions, automating build, test, and deployment workflows to improve software delivery and deployment reliability.
- Operated a large-scale Jenkins platform on Kubernetes, managing **100+ Jenkins master pods** and **300+ Linux, Windows, and macOS build agent pods** across **65+ Kubernetes worker nodes**, ensuring high availability, scalability, and platform performance.
- Automated infrastructure provisioning, configuration, and lifecycle management using Terraform and Ansible, delivering repeatable, scalable, and reliable cloud infrastructure deployments.
- Administered and optimized Kubernetes clusters by managing node pools, networking, storage, workload scheduling, autoscaling, and high-availability configurations.
- Managed artifact repositories using Nexus Repository Manager and GitHub Packages to support enterprise software delivery pipelines.
- Built event-driven automation solutions using Argo Workflows and Argo Events to orchestrate Xcode upgrades and lifecycle management on AWS EC2 Mac instances and Dedicated Hosts, improving platform reliability and reducing manual operational effort.
- Planned and executed production infrastructure upgrades, Kubernetes node pool migrations, storage migrations, and operating system upgrades with minimal downtime.
- Collaborated with software engineering, QA, and infrastructure teams to troubleshoot production issues, improve CI/CD workflows, and enhance platform reliability.

CERTIFICATIONS

Certified Kubernetes Administrator (CKA) 

HashiCorp Certified: Terraform Associate (004) 

EDUCATION

Master of Computer Application - MCA

S.A. Engineering College (Autonomous), Chennai

2022 – 2024
